DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Klimesch et al (5,073,379) or Goertz et al (4,801,460) or Klimesch et al (4,880,585).
3. Each of the references discloses a molded dosage form. Although made by a different method than that which is claimed, the claimed product appears to be identical to that which is claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 1732

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Klimesch et al (4,880,585) in view of Krismanth et al or Wolfe et al or WO 97/36722.

7. Klimesch et al discloses molding a solid dosage form from a mixture of active ingredient and polymeric binder using molding rolls (4). Krismanth et al, Wolfe et al and WO 97/36722 each disclose molding rolls in which one roll has an annular groove and the other teeth extending radially outward able to engage the annular groove. It would have been obvious to one of ordinary skill in the art to use the rolls of Krismanth et al or Wolfe et al or WO 97/36722 in place of the rolls of Klimesch et al because they are all molding rolls that mold individual forms but allows one to choose the desired shape of the molded product.
